MY SCHOOL BUS

FUTURE OF SCHOOL BUS MONITORING EXPERIENCE

A complete and real-time connection between the bus, the school and the guardians/parents to have the location of the buses and kids up-to-date by using the best reliable technology available.

With this rapid increase in the smartphone users it paves the way for technology based applications to service towards safety and security of individuals. We are expecting rapid change the way people uses phones, using them from just a phone to multi-tasking tool to do almost everything possible.
THEN WHY NOT MONITOR THEIR KIDS.

DO WE NEED SUCH TRACKING ?

- If the child does not board/missed the bus while pick/drop
- If bus takes a halt between school and home
- In the event of abnormal behavior such as, bus changing route, bus delay, etc.
- Any form of bullying by the co-passenger or abuse by the bus staff
- In the event of **unfortunate incident** (accident, hijack, etc…)

COMPENDIUM
